EDUCATION

Portland State University
Bachelor of Computer Science

2024-2027
GPA: 3.98

PROFESSIONAL AND RELEVANT EXPERIENCES

Full Stack Intern

June 2026 - Sep 2026

Currie & Brown

Portland, Oregon

- Developed **2 full-stack features** for an internal data platform using **C#/.Net, React, TypeScript, SQL, and REST APIs**, contributing across frontend, backend, and database layers.
- **Integrated an AI agent into the invoice extraction workflow** and evaluated Azure Document Intelligence results **across 500+ invoices, improving data accuracy by up to 25%** and reducing manual corrections.
- Partnered with front-end developer to **lead the frontend redesign**, modernizing the UI of an internal web application.
- **Resolved 15+ bugs** and refactored existing code to **reduce technical debt by 10%**.

Software Engineer Intern

Jul 2025 - Sep 2025

FPT Software

Ho Chi Minh City, Vietnam

- Designed, developed, and maintained backend and frontend framework using **Java with Spring Boot, Rest APIs and JavaScript/HTML/CSS**, improving user interface for an internal learning platform.
- Implemented **2 features: an assessment tool and certificate generation in Java** to optimize service performance.
- Prototyped interactive frontend widgets with **Node.js and TypeScript** and applied Artificial Intelligence, creating reusable components that **enhanced user engagement on the platform**

I.T Specialist

Sep 2025 - Present

Portland State University Library

Portland, Oregon

- Provide **technical support to 200+ users** on computers and research stations using the ticketing system and remote-desktop
- Manage **reimaging and use Active Directory (AD)** to manage **over 300 users** and IT device accounts
- Practice **IT Inventory Management of 250+ Mac/Windows** computers, ensuring accurate asset tracking
- **Document** user guides for **device troubleshooting, reducing repeated help requests by 25%**.

PROJECT

meowclub - Real-Time Messaging App | github.com/minomeow12/coffee-chat-app

React, TypeScript, Socket.IO, Axios, Tailwind CSS, Jest

- Built a **real-time messaging app** with React, TypeScript, and Socket.IO, featuring unread badges, online status, emoji support, and automatic sender discovery. **Wrote 20+ unit tests using Jest + React Testing Library** to validate messaging functionality

Trimet BreadCrumb Data Pipeline | github.com/minomeow12/trimet-streaming-data-pipeline

Python, GCP, PostgreSQL, BeautifulSoup

- Engineered an automated **GCP Pub/Sub data pipeline** across 3 distributed VMs, validating and storing **3.17M+ TriMet GPS records**. Built ETL validation, transformation, and backup workflows with **15+ data-quality rules, achieving 1,300+ mssg/sec** throughputs

SKILLS

- **Programming Languages:** Java, C#, TypeScript, JavaScript, Python, C/C++, SQL
- **Technologies:** React, .NET, Spring Boot, Node.js, PostgreSQL, MySQL, MongoDB, REST APIs, Git Version Control, Jest, Socket.IO
- **Languages:** English, Vietnamese
